'If you think Education is Expensive, Try ignorance.'

Andy McIntyre

Think about it!

- You invest a great deal of time and money building your organisation's IFRS knowledge, yet more often than not the fundamental, basic knowledge of IFRS is weak.
- Training high level material on shaky foundations leads to demotivation, limited consolidation of information and no transfer of training to the work-place.

What is the solution to ensure your investment on IFRS training contributes to your bottom line ?

The solution: FUNDAMENTALS

Fundamentals is an inexpensive way to ensure all your staff are up to speed with IFRS. Fundamentals is an e-learning program that learners complete on a monthly basis anytime, anywhere as you don't need to be online.

How does it work?

- Each monthly module is easily downloaded to a learner's computer (there is a help option should a learner not be familiar with the program).
- Each module is an interactive 30-minute monthly quiz on the basics of IFRS.
- The learner needs to pass this quiz in order to get credit for the module.
- If learners don't pass the quiz, they have to complete a short theory section, to help them research the topic before retrying the quiz.
- Each monthly module is added to the fundamentals program creating your own IFRS module library on your PC.

Measurable Results

- Users get 30 minutes VERIFIABLE CPD for each module completed.
- Once completed, learners can either print off their CPD certificates, or click 'E-mail Results'. An e-mail will then be sent to our online tracking system.
- Results are tracked to enable reporting of who has completed each module, and to identify common problem areas.
- Companies can also review the results of all employees online, and identify areas where learning is required.
- Results are tracked online and users can access their own records.

In Summary

- Quick 30 minute updates that focus on the basic principles
- Interactive, fun, useful
- CPD verifiable
- Inexpensive
- Ability to track usage/problem areas
- Own your time – can be done anywhere, anytime
- Useful for all levels of knowledge
- Cost is per office not per user

Costs per office are as follows (excl. VAT):

- | | |
|-------------------|-----------------|
| • Individual | R167 per month |
| • 2 - 5 users | R550 per month |
| • 6 - 20 users | R950 per month |
| • 21 - 40 users | R1400 per month |
| • 41 - 80 users | R1900 per month |
| • 81 - 120 users | R2300 per month |
| • 121 - 200 users | R3000 per month |

YOUR INVESTMENT

- You have the option to receive the modules bi-annually via a posted CD (6 modules per CD) vs. downloading the modules from the emailed linked on a monthly basis.
- For this option, there is an additional cost of **R50** per year for the material and postage.
